

# PEGASUS Sensations

Whirlpool Baths

Pegasus Whirlpool Baths provides everything you could possibly desire in a whirlpool bath with Pegasus Sensations!

Pegasus Sensations is the uniquely developed whirlpool system that has evolved as a result of our managing directors 27 years experience within the whirlpool industry. The focus whilst designing this system was based around three concepts: Performance, Hygiene & Reliability.

#### Performance:

This is where the experience & craftsmanship along with quality of parts used have a vital role in how we produce a system that we believe is the best in the marketplace today. Our craftsmen hand build, from scratch, each & every system we provide. They build each system to the customers exact bespoke preference. This means that you are in control of exactly what features you want when our craftsmen build your whirlpool bath.

#### Hygiene:

We have nothing to hide when it comes to our whirlpool bath pipe work. Our pipe work is in it's 4th generation stage & is uniquely hygienic in comparison to other systems on the market. We have literally turned our system upside down. This means that when the bath is emptied, the water has to completely drain. Just to make sure that every last residual drop of water has completely gone from the pipe work, we have incorporated an auto-purge feature that automatically switches on and blow dry's the pipe work twenty minutes after the bath water has drained. Take a look online for a 360° spin of a Pegasus Sensations whirlpool bath & it's 4G pipe work:

#### Reliability:

A great deal of thought & deliberation has gone into the reliability of our Pegasus Sensations whirlpool system. We want your Pegasus Sensations whirlpool bath to be your personal haven where you can relax & enjoy all the benefits of Hydrotherapy, Chromotherapy & Aromatherapy. A unique, state of the art glass control has been developed especially for use with our Sensations whirlpool. This control is touch sensitive & provides the bather with a multitude of functionality at their fingertips. The stylish glass control is simple to use & is available in three different colour options, (black, white & silver).

Our aromatherapy oils are the perfect compliment for all of our whirlpool baths. They are hand blended in the UK using the finest natural resources & ingredients. Made especially for use with Whirlpool & Air baths, they are low foaming & contain 3% essential oils.

## Hygiene & Whirlpool Care

### Whirlpool Bath Cleanser

For regular cleaning of a whirlpools pipework.

1. Simply fill the bath with warm water, add the contents with the air controller closed & switch on the whirlpool for 10-15 minutes.
2. Drain the bath & rinse thoroughly.

### Whirlpool Bath Sanitisers

For regular sanitizing of a whirlpool bath.

1. After each use of the bath & before emptying, simply put one tablet into the bath water.
2. Switch on the system & let it run for 2-3 minutes.
3. Switch off the system & let it drain as normal.
4. Your whirlpool bath has now been effectively sanitized.

## Relax the Body, Mind & Soul

Mildly foaming, fragrant bath oil formulae blended especially for use in Whirlpool and Air-Spa baths. Contains 3% Essential oils!

The air and water action of a whirlpool bath is one of the most effective means of releasing the true potential of essential oils to work on both the mind and body. In addition a whirlpool bath continually re-circulates the bath water ensuring even distribution of any essential oils added to the bath thereby promoting: Absorption - Inhalation - Relaxation

**Absorption** - The bubbling action of a whirlpool bath softens the skin and opens the pores enabling the body to easily absorb essential oils.

**Inhalation** - The millions of bubbles created by the whirlpool system carry small molecules of the oil gradually rise to the surface where they are transformed into a steamy vapor just above the water. The bather benefits by inhaling this aromatherapy vapor rich in essential oils.

**Relaxation** - The gently swirling waters of a hydro-massage system relax muscles and ease away the aches, pains, stresses & strains of the day. This promotes a sense of well being and sound sleep which in turn creates a relaxed body & mind on which the essential oils can work to maximum effect.

### Hand blended using natural ingredients

No medical claims are made for the use of this product. Use within 3 months. of purchase. Not Tested on Animals Caution: Do not use if pregnant. Keep concentrate away from eyes, mouth, children and pets. New size contents now 200ml.
